

Integral Power Supply Housing / Sidekick System

For use with MLR Sidekick System

Technical Sheet

Houses integral power supply for MLR Sidekick System. Direct conduit feed is recommended, but integral power supply housing will mount to any standard North America 4" j-box. Mounts to most surfaces and accommodates most standard, dimming, and emergency ballasts. Blocking is recommended at all arm junctions. Variations in the flatness of the mounting surface can effect alignment of system. For long runs, Vode recommends that special attention be paid to the flatness of the mounting plane. Use Vode Strut for best results. Standard finish brushed aluminum.
